

MD SAKHWAT HOSSAIN

Full-Stack developer

Email: hmdsakhawat236@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#) Phone: 01851121472

CAREER OBJECTIVE

Fresher Full Stack Developer with a strong foundation in JavaScript and backend development using Node.js and Express.js, experienced in building end-to-end applications from scratch. Focused on optimizing performance and implementing scalable solutions using modern AI development tools. Aiming to deliver impactful, reliable systems while continuously learning in a fast-paced engineering team.

TECHNICAL & SOFT SKILLS

Frontend: JavaScript (ES6+), React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST API

Database: MongoDB, MongoDB Atlas.

Tools: Git, GitHub, VS Code, Postman, Firebase, NextAuth.js, Netlify, Vercel, Figma, TanStack Query, Recharts

Soft Skills: Time Management, Problem Solving

Projects

TicketBari (Online Ticket Booking Platform) Dec 2025 - 2025

[Live](#) | [client](#) | [server](#)

Developed a high-concurrency full-stack SaaS platform ensuring accurate and reliable ticket booking across multiple transport services. Engineered a payment-contingent seat update system using Stripe, ensuring tickets are reserved only after successful transactions and preventing inventory inconsistencies.

- **Implemented** role-based dashboards (User, Vendor, Admin) with Firebase authentication and protected routes for secure access control
- **Built** a dynamic booking and payment workflow with Stripe, enabling real-time seat synchronization and eliminating false reservations
- **Developed** advanced search, filtering, and vendor analytics using TanStack Query and Recharts to enhance user experience and business insights
- **Designed** admin controls, including ticket moderation, vendor verification, and a toggle-based advertisement system
- **Tech Stack:** React, Node.js, Express, MongoDB, Stripe, Tailwind CSS, TanStack Query, Firebase.

Care-XYZ (Automotive Service & Booking Platform)

Jan 2026 - Jan 2026

[Live](#) | [GitHub](#)

Developed a responsive full-stack caregiving platform that enables users to book trusted care services for children, the elderly, and sick individuals based on location and required duration. Implemented a structured booking system with dynamic cost calculation and real-time booking status tracking to ensure a smooth and transparent user experience.

- **Full Admin Suite:** Developed a dashboard for managing services, user roles, and real-time booking statuses.
- **Cloud Infrastructure:** Leveraged **MongoDB** for data and **Cloudinary** for scalable media storage.
- **Email Automation:** Automated HTML email invoicing with Nodemailer and integrated Cloudinary for scalable media storage, enhancing system reliability and user communication
- **Tech Stack:** Next.js 16, MongoDB, NextAuth, Tailwind CSS, Nodemailer, Cloudinary, Lucide Icons

Home Nest (Property Buy & Sell Platform) | Nov 2025 - Nov 2025

[Live](#) | [Client](#) | [server](#)

Developed a modern property buy-sell platform enabling users to explore, list, and manage real estate listings with a seamless and intuitive interface. Implemented advanced filtering and search functionality to help users quickly discover properties based on location, price, and type, improving overall usability and efficiency.

- **User-Friendly Interface:** Designed a clean interface to browse, list, and manage properties.
- **CRUD Operations:** Implemented Create, Read, Update, and Delete functionality for property management.
- **Filtering & Search:** Implemented filters for location, price, and property type for easy property discovery.
- **Feedback System:** Anyone can provide feedback on the specific property if they wish.
- **Tech Used:** React, React Router, Firebase, Tailwind CSS, DaisyUI, Swiper JS, MongoDB, SweetAlert2
